*Not currently available on fixed wireless

Information about the service

The Service:

Our **NBN Broadband** service offers post-paid asymmetrical internet interface speeds* up to 100/20Mbps** via the National Broadband Network where available and an included data allowance. You can choose to have your speed reduced (shaped) to 256kbps once you used up all your included allowance or you can continue using the service at the same speed and pay excess data charges. There are no peak or off peak restrictions on your use.

Mandatory components:

If your existing connection is nonstandard, NBN Co will discuss any additional charges with you and these charges

will appear on your first bill. You will require a router or firewall at your premises for this service to work. We can provide our Home Network Gateway for self-installation at cost \$110. Additional charges apply for Home Network Gateway installation and replacement. We will deliver your service to the Network Boundary Point at your premises, which is defined as the physical port or 'UNI' on the NBN Network Termination or port on the Home Network Gateway if selected. The cabling that is required in your premises beyond the Network Boundary Point is your cost and responsibility, as is the provision of a suitable 240V AC power outlet. Please contact us for further information. All bills are delivered by email and Direct Debit from either a bank account or credit card is required.
